### PROFESSIONAL SUMMARY

---

Results-driven Full Stack Developer with 2+ years of experience designing, developing, and deploying scalable web applications. Proficient in PHP 8+, React.js, CodeIgniter 3/4, and OpenCart 2.x/4.x with expertise in RESTful API development, MVC architecture, and custom module development. Delivered 10+ production-grade applications across e-commerce and enterprise domains. Skilled in Agile development, cross-functional collaboration, MySQL performance tuning, and responsive UI implementation with a strong focus on code quality, maintainability, and on-time delivery.

### TECHNICAL SKILLS

---

**Backend:** PHP 8.0+, CodeIgniter 3/4, RESTful APIs, HMVC/MVC Architecture, OOP, Design Patterns

**Frontend:** React.js (Hooks, Components, Props, State, JSX), HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, Tailwind CSS, Responsive Design

**Database:** MySQL, Database Design, Query Optimization, Indexing, Transaction Management

**E-Commerce:** OpenCart 2.x & 4.x, Custom Module Dev, Payment Gateway Integration, Theme Customization

**Tools:** Git, GitHub, Postman, Apache, Linux, MySQL Workbench, VS Code, npm, Webpack

**React & Node.js:** React.js, Node.js, REST API, Component Architecture, State Management, npm, Axios

### WORK EXPERIENCE

---

**Full Stack Developer** | Sigma Computers | Salem, TN

2024 – Present

- Designed and implemented RESTful APIs, enabling seamless integration between front-end interfaces and backend services to improving platform flexibility and client satisfaction.
- Developed and maintained scalable backend systems using PHP 8+ and CodeIgniter 4, adhering to MVC architecture, SOLID principles, and design best practices.
- Optimized MySQL queries, indexing strategies, and database schemas — reducing query execution time by up to 40% and improving overall application performance.
- Integrated third-party APIs and payment gateways, automated report generation, and built reusable UI components using React.js and Bootstrap — reducing development time across projects.

### KEY PROJECTS

---

**S2Media — Advertising Management System** — PHP, CodeIgniter 4, MySQL, jQuery May 2025 – Present

- Designed and built a full-featured ad booking and billing platform supporting multi-channel media placements across newspapers, radio, TV, theatre, outdoor, and digital channels (YouTube) — enabling end-to-end campaign management.
- Developed Release Order (RO) and automated invoice generation modules using PHP and CodeIgniter 4, streamlining the campaign lifecycle from booking to billing and reducing manual processing time.
- Implemented client management, payment tracking, and real-time booking dashboards with a fully responsive UI — improving operational visibility and user experience for media planners.

**AARC — Budget Planning & Audit System** — React.js, MySQL, REST API

Jan 2026 – Present

- Developed a React.js-based annual budget planning and audit system, enabling organizations to project, allocate, and monitor departmental budgets with an interactive, component-driven UI and real-time data visualization.
- Architected RESTful API integration between React frontend and PHP backend, implementing audit workflows with real-time variance tracking, role-based access control, and dynamic dashboard reporting to support data-driven financial decisions.

### EDUCATION

---

**B.E. Mechanical Engineering** | Sona College of Technology, Salem 2018 – 2022 | CGPA: 8.07

**HSC (84.3%) & SSLC (93.8%)** | Sri Gayathri Higher Secondary School, Salem 2014 – 2018
